To our customers

## Statement regarding the Covid-19 Corona virus

Eson Pac's and Märkas production facilities and personnel are in Sweden, Norway and Denmark, with 3-rd party suppliers and raw-material suppliers located in Europe.

As the virus is spreading through Europe the management of Märkas and Eson Pac are following the situation closely and have taken internal measures to limit the exposure of personnel towards the identified infected geographies. Should any of our personnel catch the virus, plans are in place to handle the situation together with the health authorities.

- We have in our BCP plan covered pandemics/ epidemics events and the planning of measures takes place per site. For example, move production from one facility to another, selection of alternative suppliers for raw-materials etc.
- We closely follow authorities' guidelines.
- All external parties are forbidden to visit our facilities, and we encourage having meetings virtually.
- All non-critical, business-related journeys are cancelled until the end of April 2020.
- We do not anticipate any disruption of business at the present state, but as stated above we have suppliers across Europe and the situation is continuously changing. We do however have limited visibility of the origin of their suppliers. At present, we have received no information of supply disruptions due to Covid-19 virus breakout.
- If production disruptions occur due to Corona virus among our personnel, we will demand other functions in our organisation to support the production, to make sure we can deliver as promised.

We will continuously update and review this statement, and keep you informed.

With best regards,

Wilhelm Aminoff  
CEO (Acting) and CFO Eson Pac Group

Lars Richardsson  
CEO Märkas AB
